## **Jonathan McKeown Solicitors to implement 50-user Eclipse Proclaim solution**

---

Rapidly expanding Northern Ireland law firm, Jonathan McKeown Solicitors, has selected Eclipse's integrated Proclaim Case Management Software solution.

The practice, based in County Down, specialises in Personal Injury claims and has become one of Northern Ireland's leading players in recent years. The firm aims to combine a traditional high-quality service ethos with the fast and efficient file processing made possible by technology. This approach has proved immensely successful and has led to Jonathan McKeown Solicitors growing to over 50 staff, with further expansion strategies planned.

To underpin its ambitious goals, the practice has selected Eclipse Legal Systems as its core software provider, and is implementing the Proclaim Case Management system for all users, with Proclaim Accounts, to form a fully-integrated practice management solution. Eclipse will be tailoring the delivered system to take into account specific claims procedures in Northern Ireland.

In addition, Jonathan McKeown Solicitors will be implementing Eclipse's FileView solution to enable clients to securely access and track live case data online.

Jonathan McKeown, Partner at the firm, comments on his selection:

"We've enjoyed unrivalled success over the past few years, and to capitalise on our growth and cement our position we need the best software system for the job. Eclipse's Proclaim solution is regarded as the market-leader, and its PI system in particular has become de rigueur for practices in our industry.

By implementing the full Proclaim 'practice management' offering, we will be providing our staff with the very best productivity and management tools. We are looking forward to a long and profitable relationship with Eclipse!"
